27 January 2009

Dear Honda owner,

According to Land Transport New Zealand records you are the registered owner of a Honda CBR1000RR Fireblade motorcycle with VIN (refer VIN Range on web page).

**You need to be aware of important information concerning a fuel tank Recall Campaign for this motorcycle. This is the second letter requesting you present your Fireblade to your nearest Honda dealer for rectification as soon as possible.**

Honda Motor Co. has determined that the fuel tank on some affected motorcycles may have a faulty vent pipe connection. This could lead to poor sealing of the fuel tank and the possibility of a small quantity of fuel leaking.

As this recall campaign is deemed to be of a safety related nature we ask that you contact your nearest Honda Dealer and arrange to have your machine booked in for repair **at the earliest possible opportunity**. The dealer will check and if necessary replace fuel tank. This work will be performed at **no cost** to you for either parts or labour.

This campaign will be monitored by Land Transport New Zealand, and we are required to report to them our progress in this matter. It is therefore imperative that you present your machine to a Honda Motorcycle Dealer as soon as possible.

If you are no longer the owner of a 2006 or 2007 model year CBR1000RR, please take the time to contact us on the below number and advise us of the details (or lack thereof) of the person to whom you disposed of the unit. This will allow us to update our records.

We trust that this recall campaign will not adversely affect your opinion of our product or your riding pleasure. Should you require any additional information on this matter, please feel free to contact us on **Free phone 0508 466 326**.

Yours sincerely,

Bruce Nielsen  
National Technical Manager
